

I have worked in education for almost 25 years, I began my teaching life in a primary setting and have also had experience in secondary too. I made the move over to a special needs setting in 2011 and have a passion for advocating for and supporting our amazing young people with additional needs.

I have worked in all areas of school from primary, through secondary and am now based in 6th form and a, centre lead for our satellite post 14 provision, The Bridge. I believe all individuals should have the right to an exciting, enriching and happy future, no matter what this looks like and love to support our students towards achieving this.
